B2B START-UP PITCHES FROM THE H2UB HYDROVERSE

This pitching session is the final demoday of the H2UB SPRINT Batch #6. Five start-ups were selected from applications throughout Europe to participate in the SPRINT, an open innovation program to accelerate the industrial application and uptake of next generation hydrogen technology. The teams from Germany, Israel and the Netherlands worked intensively with their mentors from our industrial network to improve their products and their strategy (e.g. RWE, P3 Consulting, DIL0 and many more) and are proud to pitch at the Hydrogen Week 2024.

Part of this session will be:

Elestor (NL): Hydrogen Flow Battery enabling long-duration energy-storage; multiple industrial pilots in the field.
Eternal Power (GER): A team of ex-McKinsey consultant developing hydrogen technology. The teams from Germany, Israel and the Netherlands worked intensively with their mentors from our industrial network to improve their products and their strategy (e.g. RWE, P3 Consulting, DIL0 and many more) and are proud to pitch at the Hydrogen Week 2024.
REJ00L (GER): Dry-running, hermetic piston compressors for small-scale applications; multiple offtake agreements with customers signed.
